MERCHANT & GOULD P.C.

Capturing opportunities beyond your expectations.

MERCHANT & GOULD IS ENGAGED EXCLUSIVELY IN THE PRACTICE of intellectual property law, including patent, trademark, copyright, unfair competition, trade secret, advertising and computer law and related litigation including both trials and appeals.

With offices in Minneapolis, Denver, Seattle, Atlanta, Washington D.C., and Knoxville, and more than 100 active attorneys, we have been practicing intellectual property law for more than 100 years. Typically, our attorneys are admitted to practice in the state where they reside and nearly all are admitted to practice before the U.S. Patent and Trademark Office. We are known as a premier intellectual property law firm.

Merchant & Gould values client relationships and actively partners with clients to understand, build, and implement technology and intellectual property strategies that add bottom line business value. In our intellectual property practice, we are committed to innovation. We focus on creative strategies that expand the potential around your idea—capturing opportunities beyond your expectations.

Before we were attorneys, many of us were inventors, engineers and scientists. We understand how passionate you are about your creation. At Merchant & Gould, we are just as intense about protecting your work. We apply insight to your opportunities and foresight to your problems. In every situation, we represent you with tenacity, force and enthusiasm.

TECHNICAL EXPERTISE Our attorneys have substantial technical knowledge to serve the needs of our clients. A number of attorneys have advanced degrees, including doctorates in their areas of expertise. In addition, the firm employs staff engineers, patent agents, legal assistants and drafting personnel to provide a full range of cost-effective intellectual property legal services.

OUR CLIENTS Merchant & Gould represents a broad spectrum of clients, including individual inventors, emerging companies, Fortune 500 corporations, governmental bodies and academic institutions. Clients represent diverse industries and technologies including chemistry, biotechnology, computer software and hardware, medicine and manufacturing.
